

Energy Conservation Incentive Scheme for Student Hostels

Energy Saving Tips

- ✦ Participate in Walk for Green
- ✦ Reduce food waste by only ordering what you can eat
- ✦ Dry your washed clothes naturally

Energy Conservation Incentive Scheme for Student Hostels

Energy Saving Tips

Living a more Sustainable and Climate-friendly life.

Living Sustainably

Living an eco-friendly life includes consciously opting for environmental choices like conserving energy, using public transportation and minimizing waste

Go Zero Waste

Reduce the amount of trash we produce by consuming what is needed, refusing single-use plastics, reusing what can be reused, and recycling what can be recycled. Remember the sequence: Reduce, Reuse, then Recycle

Support Local

Buying from local farmers, producers, and shops reduces our carbon footprint because less pollution is created during transport. It also helps the local economy grow and thrive

Energy Saving Tips

Separation and Sorting

Separate and sort waste at home or on campus to improve recycling rates and the quality of materials recovered, reducing the energy needed for processing recycled materials.

Composting

Composting organic waste at home reduces methane emissions and produces nutrient-rich soil for home gardening.

Choose Eco-friendly Packaging

Support products with minimal or sustainable packaging that not only reduces waste but also cuts down on the energy used in manufacturing and disposal.

Energy Conservation Incentive Scheme for Student Hostels

Energy Saving Tips

01

Use public transportation or carpool with friends and avoid driving

02

Avoid leaving your electronic devices in standby mode but turn them off

03

Close the door of an air-conditioned room so it does not use more energy
