1. Course description

In accordance with the college founding aspiration, “Learning, innovation and benefitting humankind,” this course provides students with opportunities to care and serve the people in the society and enhance their understanding of the problems and issues of the community, as well as the capacities and assets of the community to promote students’ apprehension of social inclusion. As a service-learning course, students will engage in experiential learning that they can critically learn and apply concepts and theories in a real-world environment. To prepare students to care for others they will first learn how to care for themselves through developing loving and kindness, empathy, mindfulness, and respect for diversity. Students will review and reflect the strengths and needs of the community. As guided by the course instructor, students are expected to design and implement service projects by themselves or in association with non-government organizations, Service Learnings, or volunteer groups as host organizations. The course concludes with a post-service review that students will share and reflect their service-learning experience to re-examine their own self to gain deeper and broader appreciation how their own discipline relates to the society and to develop an enhanced sense of civic responsibility.

2. Learning outcomes

Upon completion of the course, students will be able to:

1. Develop self-awareness and self-management of one's own psychological well-being
2. Apply knowledge and skills to access strengths and needs of the community, and to develop corresponding courses of action.
3. Develop empathy, care and concern, and respect towards people.
4. Appreciate how volunteerism and service learning can bring about positive changes to the community.
5. Appreciate how their own discipline relates to and contributes to the society
6. Develop an enhanced sense of civic responsibility to promote greater good in the society.

4. Course components (Learning activities)

The course will employ the following methods of instruction:

- a. *Lectures and workshops* – The instructor will introduce relevant concepts and themes during lectures. Students are encouraged to raise their areas of concern in the lectures and participate in the discussions initiated by the instructor. Students will be encouraged in making group discussions to share and reflect values as well as worldviews with each other in greater depth.
- b. *Community Visits and Service Learning Projects* – Students will visit local communities and NGOs to understand the real context as well as resources and need of people. Students will be divided into 5 groups. Each group will formulate a service project in serving the community, by utilizing the knowledge and skills learnt in the course as well as from their own discipline or profession.
- c. *Group project presentation* – Students are required to make group presentations. Through preparation for the group presentation, students will consolidate knowledge acquired from lectures and readings and reflect their learning gained from the Service learning project.
- d. *Blackboard forum* – Students are encouraged to make use of the Blackboard forum to discuss relevant issues with the instructors and other students outside the classroom.
- e. *Readings* – Students have to read the articles stipulated for each topic before the lectures and workshops. Essential readings are also stipulated for the major themes included in the course. Students are also encouraged to consult other readings listed in the reference list.
- f. *Audio-visual aid* – Whenever appropriate, audio-visual materials will be used during class to aid the instruction.

"This course will invite students to participate in experiential learning/ activities for personal growth and professional development. For those who are overwhelmed or with signs of psychological or emotional impact, they are encouraged to speak with the course instructor and seek professional help for appropriate support."

❖ Grade Overall Performance

A	Outstanding performance on all learning outcomes
A-	Generally outstanding performance on all (or almost all) learning outcomes
B	Substantial performance on all learning outcomes, OR high performance on some learning outcomes which compensates for less satisfactory performance on others, resulting in overall substantial performance
C	Satisfactory performance on the majority of learning outcomes, possibly with a few weaknesses
D	Barely satisfactory performance on a number of learning outcomes
F	Unsatisfactory performance on a number of learning outcomes, OR failure to meet specified assessment requirements

9. Academic honesty and plagiarism

Attention is drawn to University policy and regulations on honesty in academic work, and to the disciplinary guidelines and procedures applicable to breaches of such policy and regulations. Details may be found at <http://www.cuhk.edu.hk/policy/academichonesty/>.

With each assignment, students will be required to submit a signed [declaration](#) that they are aware of these policies, regulations, guidelines and procedures.

- In the case of group projects, all members of the group should be asked to sign the declaration, each of whom is responsible and liable to disciplinary actions, irrespective of whether he/she has signed the declaration and whether he/she has contributed, directly or indirectly, to the problematic contents.
- For assignments in the form of a computer-generated document that is principally text-based and submitted via VeriGuide, the statement, in the form of a receipt, will be issued by the system upon students' uploading of the soft copy of the assignment.

Assignments without the properly signed declaration will not be graded by teachers. Only the final version of the assignment should be submitted via VeriGuide.

The submission of a piece of work, or a part of a piece of work, for more than one purpose (e.g. to satisfy the requirements in two different courses) without declaration to this effect shall be regarded as having committed undeclared multiple submissions. It is common and acceptable to reuse a turn of phrase or a sentence or two from one's own work; but wholesale reuse is problematic. In any case, agreement from the course teacher(s) concerned should be obtained prior to the submission of the piece of work.

Guideline about plagiarism

Any assignment (i.e., project, essay, or paper) that shows evidence of plagiarism will be marked down severely. In simple terms, plagiarism is copying passages and/or ideas from other sources without referencing those sources. Moreover, when you report someone else's ideas/findings you must put it in your own words and not merely copy full sentences or parts of sentences from the source article. It is your responsibility as a scholar-in-training to cite the ideas and work of others correctly.

In all cases of plagiarism, the student's name will be recorded in a central database maintained by the general office. If a student is referred for plagiarism in more than one course, or more than one instance in the same course, the student's case will be forwarded to the university administration for follow-up action. If the charge is established, the penalty guidelines are as follows:

<i>Plagiarism</i>	<i>Minimum Penalties</i>
First offence	i) One demerit; ii) A mark of zero for that component of the course; and iii) Completion of relevant training in academic honesty

Second of further offence (and a first offence that is serious as decided by the disciplinary committee concerned / the FTP Committee)	<ul style="list-style-type: none"> i) Two demerit (of which one will remain in the University's record permanently and one is reviewable) and; ii) A failure grade for the course concerned
--	---

Detecting plagiarism

The Senate Committee on Teaching and Learning requires that all student assignments in undergraduate programmes should be submitted via VeriGuide. This policy will only apply to assignments in the form of a computer-generated document that is principally text-based (i.e., excluding calculations in science, brief laboratory reports, drawings in fine arts and architecture, etc.).

- Each student must upload a soft copy of the completed assignment to the plagiarism detection engine VeriGuide, at <https://veriguide1.cse.cuhk.edu.hk/cuhk/>
- The system will issue a receipt which also contains a declaration of honesty, which is the same as that in [http://www.cuhk.edu.hk/policy/academichonesty/Eng_hm_files_\(2013-14\)/p10.htm](http://www.cuhk.edu.hk/policy/academichonesty/Eng_hm_files_(2013-14)/p10.htm)
- The declaration should be signed on the pdf, attached with the soft copy of the assignment upon submission.

10. Use of Generative Artificial Intelligence (AI) Tools in Teaching, Learning and Assessment

Use of AI tools is allowed with explicit acknowledgement and proper citation

Students may use some AI tools in some class activities and assignments on the condition that they make explicit acknowledgement and proper citations of the input from AI tools.

Acknowledging support from AI tools

Students are required to acknowledge all functional uses of a generative AI tool and cite it when they paraphrase, quote, or incorporate into their own work any content (whether it is text, image, data, or other format) that was created by it.

An example of acknowledgement

'I acknowledge the use of (name of AI tool – e.g. ChatGPT (<https://chat.openai.com/>) to (specify the support, e.g. plan my essay, generate some ideas for the content, ask for examples of data collection instruments, get the dates of historical events, etc.).

An example of citation

OpenAI. (2023). *ChatGPT* (Mar 20 version). <https://chat.openai.com/chat>

(Students are reminded that due to the rapid developments of generative AI tools, some citation formats may be updated regularly.)

An example of including texts generated by an AI tool in their work

*"The following text was generated by an AI tool / language model (ChatGPT):"
[Insert the text generated by ChatGPT here.]*

An example of including texts generated by an AI tool and the prompts that were used to elicit the text from the AI tool

*"[The prompt], as generated by an AI language model (ChatGPT):"
[Insert the text generated by ChatGPT in response to the prompt.]*

Students are reminded to learn and use the AI tools responsibly and ethically and be aware of the limitations.

Students are reminded to clarify with the course teacher and obtain permission if necessary when in doubt.
